Right No.: _____ RESOLUTION NO. 5-27-09B

Date: _____

Submittee: A RESOLUTION TO PURSUE NEW NUCLEAR POWER DEVELOPMENT
WITHIN EMERY COUNTY AND THE STATE OF UTAH

WHEREAS, Emery County and the State of Utah requires affordable and abundant energy for homes and businesses to maintain and grow their economy; and,

WHEREAS Emery County relies upon the energy generation industry for much private employment within the County; and,

WHEREAS, Utah and the surrounding western states have experienced increased new electricity demands and have forecasted continued increases over the next several decades; and,

WHEREAS, Utah and the surrounding areas will likely suffer significant financial difficulties without new reliable and affordable electric generating resources being built, adding to and prolonging the depressed economy; and,

WHEREAS, nationwide nuclear power provides low cost, long term, stable retail and wholesale pricing for customers; and,

WHEREAS, the development of nuclear power plants will provide significant economic benefits to the local, regional, and state populations in the form of many high paying jobs and additional tax revenues; and,

WHEREAS, a new nuclear facility in Emery County would greatly enhance Emery County's economy during a two unit construction period spanning up to seven years and would provide hundreds of permanent jobs for highly skilled workers over the plant's 60 - 80 year projected lifetime; and,

WHEREAS, United States' nuclear industry has accumulated almost 3,400 reactor years of operation since the first plant started in 1954 without a single injury or death to a single member of the public;

NOW, THEREFORE, BE IT RESOLVED that the Emery County Commission urges that new nuclear power development be pursued within the boundaries of the State of Utah including within the borders of Emery County.

BE IT FURTHER RESOLVED that the Emery County Commission urges that commercial development of new nuclear power be pursued in the county due to its beneficial impact on the economy, fuel diversification, and the environment, and its impressive operational safety and security record.

BE IT FURTHER RESOLVED that the Emery County Commission encourages investor-owned and municipally owned utilities and power marketers and traders to consider participating in a nuclear power project in Emery County.

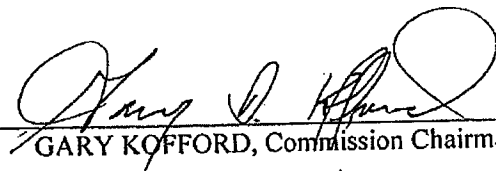

BE IT FURTHER RESOLVED that the Emery County Commission directs staff including, but not limited to Economic Development, Public Lands, IT and Planning and Zoning to provide support and appropriate information to potential developers of nuclear power within Emery County.

This Resolution shall become effective immediately upon adoption by the Emery County Commission.

DATED this 27th day of May, 2009.

EMERY COUNTY COMMISSION

By

GARY KOFFORD, Commission Chairman
