9. EXPLANATORY.

The Kane County Water Conservancy District (District) files the change application to use 29,600 acre-feet of water previously approved for a coal-fired steam generation power plant known as the Kaiparowits project. The Kaiparowits power project was abandoned after the lands were included as part of the 1996 Grand Staircase-Escalante National Monument.

The District proposes that the water now be used for a nuclear power plant, with a rated capacity of 1,500 to 3,000 MW, in Emery County pursuant to a Water Rights Lease Agreement with Transition Power Development LLC (TPD). TPD is a Utah limited liability company which serves the electric power generation industry by identifying and developing new nuclear power plant sites in the western United States.

The water rights for the change application are part of Utah's

under the Colorado River Compact. Rather than divert the water from Lake Powell as previously authorized, the application proposes to divert the water from another point on the Colorado River drainage in Emery County.

The original Application to Appropriate Number A35818 was approved for all the water diverted to be 100% depleted. Likewise, water under this change application may be 100% depleted.

The hereafter points of diversion from the Green River and the hereafter places of use described in the change application represent alternative points and places of use. After construction, the points of diversion and places of use not utilized will be abandoned.

10. SIGNATURE OF APPLICANT(S).

The undersigned hereby acknowledges that even though he/she/they may have been assisted in the preparation of the above-numbered application, through the courtesy of the employees of the Division of Water Rights, all responsibility for the accuracy of the information contained herein, at the time of filing, rests with the applicant(s).
