of Water a35874 on water right 09-462

PROTEST

In Emery County

I. Introduction

We hereby file a protest on change application a35874 filed by the San Juan County Water Conservancy District (the "District") to relocate the point of diversion on 24,000 acre-feet of water from the San Juan River to near the town of Green River, Utah. The application is for up to 100% depletion of this amount of water from the proposed point of diversion.

II. Protesting Party

We currently reside in the town of Green River Utah and our drinking water, lawn and garden water, and farm water comes from the Green River. This proposed transfer of water from San Juan water district to our area for the purposes of a nuclear power plant will directly affect us.

III. Legal Framework

Unappropriated water in the source

We believe there may not be unappropriated water in the Green River sufficient to support the proposed water use in the application. A review of the Division of Water Rights'
