original to fax

Gentlemen:

In response to application 09-462(a35874) proposing the use of 24000 ac-ft. for steam generation. We respectfully submit the following protest.

The dam located north of Green River supplies water to several users. Thayns have an existing 600 cfs. Non-consumptive right plus consumptive rights. The diversion in its current condition is unable to deliver the water appropriated.

We are concerned how additional water will affect the environmental issues involved.

Sincerely,

Lee Thayn
