

- Increasing stream temperature through a reduction in volume of flow (and the potential action of returning warmer processed water back into the river);

We ask that the State Engineer deny the application for 24,000 acre-feet or delay it until the impacts of the proposed diversion on the state listed fish can be analyzed. We are concerned about the cumulative impacts of future diversions that may affect the flows in the Green River. If you have questions concerning this letter, please contact Jana Mohrman of my staff at 303-236-4486.

Sincerely,

Megan A. Estep
Chief, Water Resources Division
